

Acadia Pharmaceuticals Inc. is providing this letter in response to your unsolicited request for medical information. It is for scientific-exchange and individual educational purposes only, and should not be copied or distributed. Information included in this letter may not be consistent with the US FDA-approved Prescribing Information for NUPLAZID® (pimavanserin) or may be related to unapproved uses of NUPLAZID. This letter is not intended to advocate any unapproved or approved use, indication, dosage, or other treatment-related decision. Acadia strives to provide current, accurate, and fair-balanced information in compliance with current industry information dissemination guidelines.

NUPLAZID® (pimavanserin) Temperature Excursion Information

This letter is provided in response to your specific request for information regarding temperature excursions with NUPLAZID.

Per the product labeling for NUPLAZID, the recommended storage conditions are 20°C to 25°C (68°F to 77°F). Excursions are permitted between 15°C and 30°C (59°F and 86°F).¹

Please refer to the United States Pharmacopeia (USP) definition of controlled room temperature to inform your medical judgment on the decision to use the product, where the following conditions also apply:²

- Mean kinetic temperature not to exceed 25° (77° F).
- Excursions between 15° and 30° (59° and 86° F) that are experienced in pharmacies, hospitals, and warehouses, and during shipping are allowed.
- Provided the mean kinetic temperature does not exceed 25° (77° F), transient spikes up to 40° (104° F) are permitted as long as they do not exceed 24 h.
- Spikes above 40° (104° F) may be permitted only if the manufacturer so instructs.
